## SPA-A joins the SPAMEETING world tour

Posted on [November 8, 2011](#)

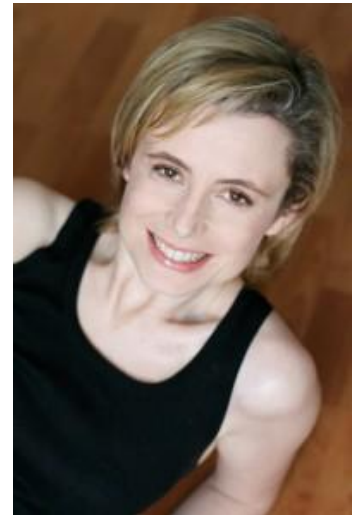

The federation of spa and wellness professionals found in SPAMEETING an event with an international impact that corresponds to its objectives. It is precisely with the aim of bringing together the community of the global spa/wellness markets worldwide that SPA-A will take part in the next series of business meetings that

have proved to be highly successful since their inception. “We have created the tools, and we will thus be able to share them outside France and even our members”, says Aldina Duarte Ramos, Chairwoman of the association.

The association intends to spread its institutional base to international markets through the active participation of its members and so to bring to SPAMEETING the assurance of an exemplary institution that is recognized by professionals.

This exceptional support will be evident from the next leg of the SPAMEETING world tour scheduled for 5th and 6th December in Istanbul, and will continue through the following editions. The Turkish edition, called UBIFRANCE, will echo the European and North European projects. This will be followed by Lisbon in March 2012 which will cover, in priority, projects from Europe, the Mediterranean and Brazil!

SPA-A in September will mark its partnership with SPAMETING Paris, with a dedicated meeting area at the event, the SPA-A village, reserved exclusively for members of the association.
